Dear Helene, Laurie, Julia, and participants of the 2-Day Challenge,

On behalf of the team at Stantec, we would like to express our gratitude for the invitation to participate in the 2-Day Challenge which has been incredibly engaging and fulfilling in more ways than we could have anticipated. It was delightful to be part of an initiative where students can take on a real-world challenge that inherently demands a holistic way of thinking and critical sensitivities to our urban landscape, ecological habitats, social and cultural values. It is these investigations that will shape our future for generations to come.

We have been overwhelmed by the students' dedication to their projects and ability to work collaboratively with such cohesion that it was difficult to believe the teams had been selected at random, and from all different programs. It was also a pleasure to witness the proud sharing of information from each discipline as well as the curiosity and willingness to learn and incorporate each other's ideas in a meaningful way with a delivered project.

The 2-Day Challenge undoubtedly left a lasting impression for us as external participants and we were pleased to support in our capacity what is such an important learning experience for students. This initiative clearly exhibits the skills and knowledge of the students at BCIT and we hope to hear about or participate in future 2-Day Challenges.

Best regards,

Ray Wolfe, Architect, AIBC, MRAIC
